

“Nanoparticles in aquaculture: Is it something to worry about?”

Nanoculture project

Webinar

Event presentation

When	13 th October 2020 10:00 (WEST)
Where	Online platform (will be shared to assistance after registration)
Main target audience	Aquaculture sector (inc. industry and retail), governmental bodies/regulators, technical services providers/consulting institutions, academia

Objectives of the webinar

1. To introduce NANOCULTURE project to the potential end-users, its main scientific and technological objectives, the funding entities and the consortium involved in the implementation (partners and associated partners).
2. To promote the innovative services and technologies under development, namely for the detection of nanoparticles to perform quality control of the production systems and respective products.
3. To attract the interest and establish synergies with stakeholders, presenting and discussing the relevant results achieved, stimulating transfer of knowledge and technology developed with the project.

Duration approx. 60 min (total)

Registration Free registration but mandatory
No limit of participants
Registration form: <https://forms.gle/5rapEyZNyGV2QtPE9>

Program

Start of streaming	10:00
#1 Webinar opening Julie Maguire Research Director Indigo Rock Marine Research Station (Ireland)	10:05
# 2 BIM Ireland's Seafood Development Agency Catherine Butler (invited speaker) Shellfish Development Executive Development and Innovation Division of BIM Ireland's Seafood Development Agency	10:10
# 3 Overview and advances of the NANOCULTURE PROJECT Begoña Espiña Leader of the Water Quality Research Group International Iberian Nanotechnology Laboratory	10:25
#4 Time for discussion Julie Maguire Research Director Indigo Rock Marine Research Station (Ireland)	10:50
Concluding remarks	11:00
