

BIOPROSPECTING ACTINOBACTERIA FROM PORTUGUESE DEEP-SEA WATERS FOR THE PRODUCTION OF NOVEL SECONDARY METABOLITES WITH PHARMACEUTICAL AND BIOTECHNOLOGICAL APPLICATIONS

FINAL WORKSHOP | 12th JULY 2022

CIIMAR Auditorium of the 3rd floor

PROGRAM

14:00h	Overview of the ACTINODEEPSEA project – Fátima Carvalho, CIIMAR
14:20h	Isolation and bioactive potential of deep-sea actinobacteria from Macaronesian Archipelagos – Inês Ribeiro, CIIMAR
14:40h	Awakening the biosynthetic potential of deep-sea actinobacteria through the OSMAC approach – Sofia Correia, CIIMAR
15:00h	Purification and structure elucidation of bioactive compounds produced by deep-sea actinobacteria – Pedro Leão, CIIMAR
15:20h	Exploring the genetic potential of deep-sea actinobacteria – Marta Mendes, i3S
15:40h	Discussion and Final Remarks – Fátima Carvalho, CIIMAR
16:00h	Closing session
