

J. Miguel Cordeiro (PhD) has obtained his Licence in Biology (Aveiro (PT)) in 1998; he then took a Master's degree in Cell Biology (Coimbra (PT)) in 2004 and a PhD in Biology (Aveiro (PT) / Genève (CH)) in 2008. He is now a researcher at CIIMAR in the field of neurobiology dedicated at studying new regulatory mechanisms of fast neurosecretion and on discovering new bioactive compounds effective against several neurological diseases tested in pre-clinical models (*Torpedo marmorata* and *Danio rerio*) of disease (Epilepsy, Parkinson's; Alzheimer's and Neuromuscular diseases).
